PRESS RELEASE

Tampa Tank-Florida Structural Steel Appoints New President

Seasoned Executive from Vigor Industrial, Corey Yraguen, Assumes Role Immediately

TAMPA, Florida (May 5, 2020) –Tampa Tank Inc.-Florida Structural Steel (TTI-FSS) today welcomed Corey Yraguen as the company’s new president. Yraguen will report to TTI-FSS CEO David Hale.

Yraguen joins the Tampa-based company after a long career in executive leadership positions on the West coast. Most recently, he was an Executive Vice President at Vigor Industrial in Portland, OR. He joined Vigor when it acquired Oregon Iron Works where Yraguen was president. Before Oregon Iron Works, he was president and CEO of US Barge LLC.

Corey Yraguen

“Corey has spent his career in the steel industry including over a decade with Oregon Iron Works and then Vigor,” said Hale. “He will focus on the development of new markets as well as advanced processes and technologies for improving efficiencies.”

TTI-FSS is currently combining its business operations with Precision Tank, Inc. to form Precision Build Companies, LLC.

“As I’ve been running my business consulting company, Balio, these past seven months, I’ve had the pleasure to look at a lot of opportunities for what’s next. This, by far, was the most interesting and the most attractive. I am excited to bring my skills to such a well-positioned, customer-focused company. The combination with Precision Tank is just the icing on the cake,” said Yraguen.

Yraguen holds a BS in Business from Oregon State University, graduating Cum Laude.

ABOUT TAMPA TANK INC.-FLORIDA STRUCTURAL STEEL (TTI-FSS)

Tampa Tank Inc. was founded in 1953 and acquired Florida Structural Steel in 1984. The company provides complete design, shop fabrication, shipment, field erection, inspection and testing of welded steel products for Federal Highway/DOT, petroleum, chemical, pulp and paper, mining, electric power, water and wastewater industries. The company operates across North America, Caribbean, Bahamas, Central and South America and West Africa. TTI-FSS is American Society of Mechanical Engineers (ASME) and American Institute of Steel Construction (AISC) certified. TTI-FSS is combining with Precision Tank, Inc. to form Precision Build.
